CLEAN LINE

ENERGY PARTNERS

PLAINS & EASTERN CLEAN LINE

Consisting of two overhead HVDC transmission lines, the Plains & Eastern Clean Line will move 7,000 megawatts of clean power from western Oklahoma, southwestern Kansas, and the Texas Panhandle to consumers in eastern markets. Just as trains carried cattle and other goods from the rural areas to urban centers, the Plains & Eastern Clean Line will carry clean energy from the Plains States, east to communities and cities that have an appetite for low-cost, clean power.

CLEAN LINE ENERGY PARTNERS

Clean Line Energy develops long-distance, high voltage direct current transmission lines to connect the best renewable resources in the United States to communities and cities with a strong demand for low-cost, clean power.
